

Accel Golf 2025 Updates

1. Download & Print The StatCard

Download the StatCard by going to accel-golf.com/statcard, or find it in the app menu. Print at home or ask the pro shop for help. Alternatively, you can manually enter the round information on your phone. While this method is perfectly ok, we recommend scanning the completed StatCard for a faster entry process.

Which way do you fold the StatCard?

Single Fold **Triple Stack**

Single Fold

- Compact
- Focus on 1-2 holes at a time
- Feels like a ninja Star
- Easy to read

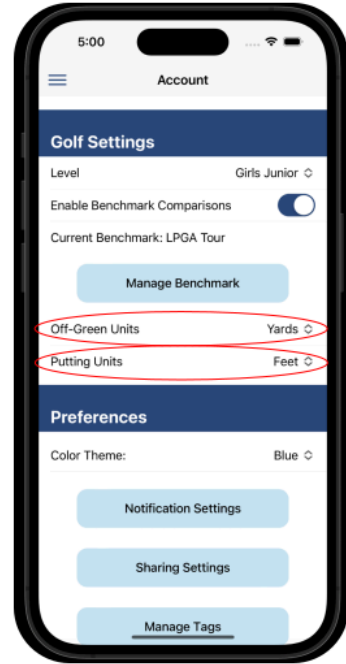

Triple Stack

- Extended view
- Prepare for the future
- Motivate yourself
- Easy to write on

2. Get ready for your first round

Make sure to set your units before entering your first round. The default units are yards for all shots off the green and feet for all putts. You can change the units under the “My Profile” tab in the app.

Feel free to explore the rest of the settings to fit your skill level, goals, and preferences!

3. Recording your golf shot information

For every shot, you should record

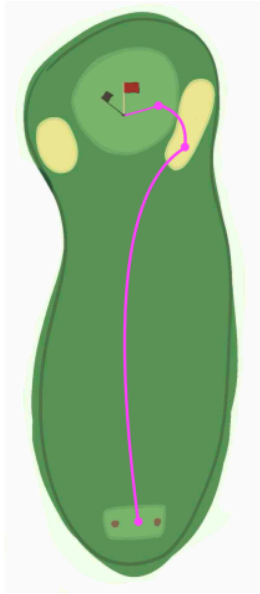

- The distance to the hole
- The END location of the shot
- A miss direction, if you missed your intended target
- If you got a penalty as a result of that shot

L/R - Left/Right	S/O - Short/Over
F - Fairway	H - Play from Hazard
R - Rough	O - Out of Bounds
G - Green	I - In the Hole
S - Sand	P: Fill in the bubble if a penalty stroke was incurred after the shot

3, 4, or 5

Distance from your ball to the hole

Par:		Distance	Loc	L / R	S / O	P
1	1	# # #		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	2			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	3			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	4			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	6			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

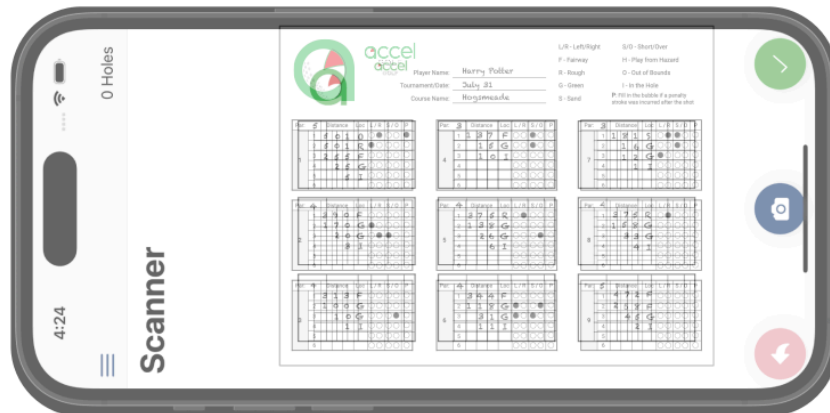

Par:	3	Distance	Loc	L/R	S/O	P
1	1	160	S	●	○	○
	2	18	G	○	○	○
	3	5	I	○	○	○
	4			○	○	○
	5			○	○	○
	6			○	○	○

In this example, the hole is a par 3 and 160 yards long. The player's first shot goes into the sand (S) and he misses it right - so he fills in the bubble under the "R". His next shot is 18 yards long and ends up on the green (G) - he did not miss his target. The final shot is a 5 foot putt that goes in the hole (I).

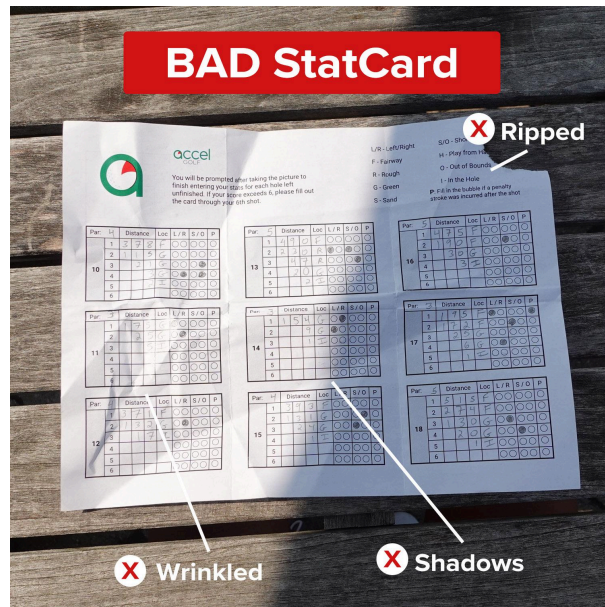

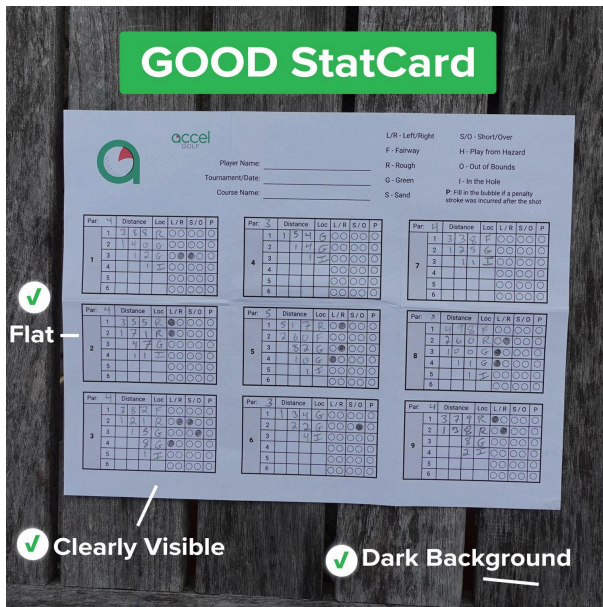

See the hazard and out of bounds videos for explanations in those situations! Remember to only use "H" if you are actually hitting the ball from inside the hazard or an abnormal lie like thick fescue - not if you drop outside the hazard.

4. Scanning the round

In the side menu of the app, click "Add Round". This will open your camera with an overlay matching the StatCard.

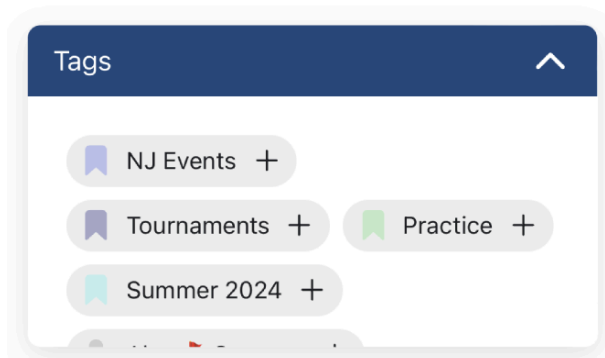

Scan as many holes as you played, and click the green check mark when done.

5. Saving the round

If any letters or numbers were scanned incorrectly, you can edit them after scanning the round. On this page, you can also add a tag to your round. Tags let you organize your rounds, lessons, and practice sessions into categories. You can have tags such as “High School Tournaments”, “AJGA Summer Events”, “Lessons with Coach”, or whatever else you may think of. Assigning a tag will help you and your coach find the round faster later on.

6. Start Analyzing

Now that your round has been saved, you can look at it in various ways:

- In the app pages
- In a report (can download and share this)
- With a summary graphic (can share this on socials)

7. Bonus features

- AI Coach: The AI Coach will figure out the best things for you to work on to help you get better faster. It will recommend drills to guide your practices.
- Drill Library: Explore our library of drills to do. You can also add your own! You can track your progress over time and see how you are improving
- Calendar: The calendar shows all your events in one place organized by date and color coded.

Here are the links to our website and the tutorial video to help you get started. If you have questions, feel free to reach out to us at support@accel-golf.com or by texting/calling 908-913-0405.
